Kirill Prokopov

prokopov.null@yandex.ru

@prokopov_kirill

Skills:

Math: Probability, Statistics, Stochastic processes and calculus, Econometrics;
Financial Math: Risk-Neutral pricing models(SV, BSM, Heston, local-volatility), Rough-volatility models, MC simulations, IR and FX derivatives;
DS: PyTorch, Sklearn, XGB, Optuna;
Scientific Computing: Jax, Numba, Numba-CUDA API, Numpy, Scipy;
Languages: English(C1), Russian(Native);
Programming languages: Python, C++(basics);
CS: Git, Docker, Bash;

Education:

New Economic School '26
Master of Arts in Economics(MAE)

Moscow Institute of Physics and Technology '24
Landau Phystech School of Physics and Research
Bachelor of applied physics and mathematics

Additional Education:

Machine Learning for Physicists – SITxMIPT, Autumn 2021- Spring 2022
Financial Mathematics introduction – Vega, Spring 2024
Stochastic Volatility Models – Vega, Autumn 2024
Monte-Carlo methods – Vega, Spring 2025

Portfolio of pet-projects:

github.com/Kirill-Prokopov/Portfolio

Achievements:

ROSATOM Physics Olympiad – First prize
MSU Physics Olympiad – Second prize
SAFMAR NES Full Scholarship

Work Experience

ATON Asset Management, Quantitative Research Department

Junior Specialist **June 2025 - present**

Main project was research of predictability of relative/absolute performace of various equity strategies via ML methods. Basically, end-to-end ML project with finance specific features: time-aware CV, low-sample/high-dimensional regime modeling, extensive feature engineering and selection.
Also, various routine infrustructure problems: Participation in creating dashboards for PMs and such.
